

PHASE 0.5 · STEP 2

Flow Chart

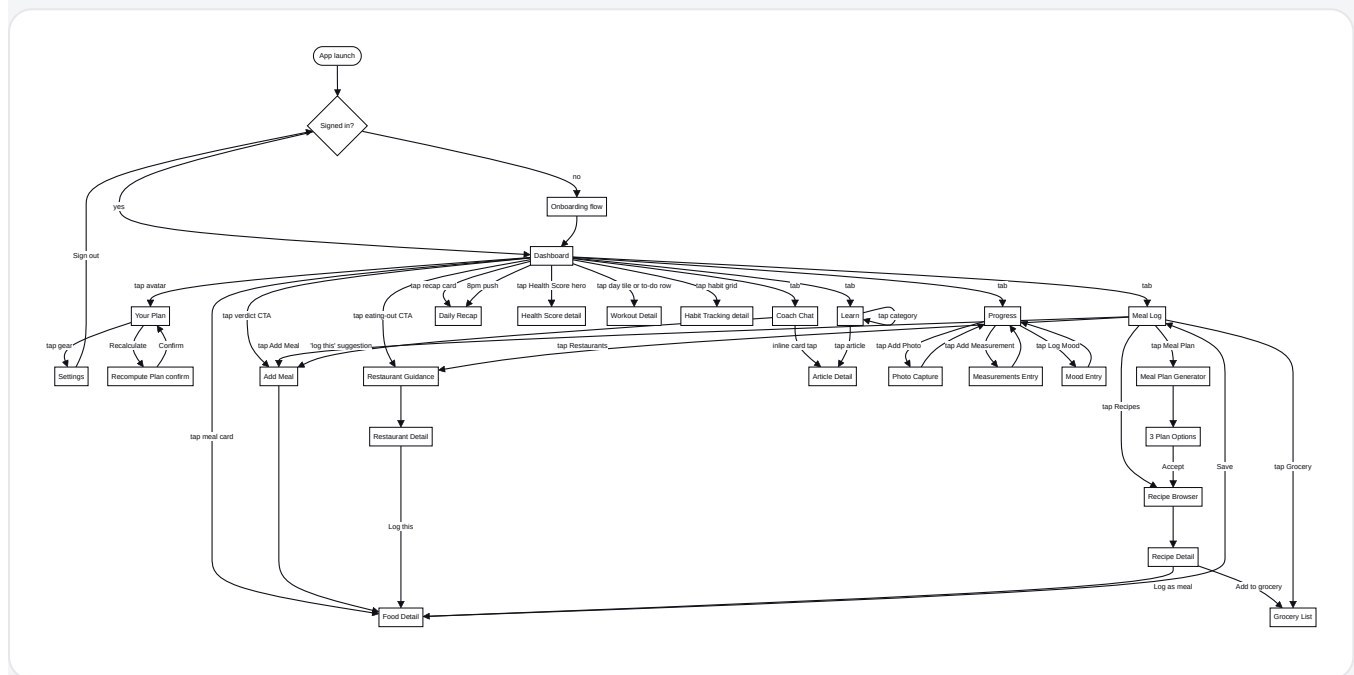

Navigation arrows + per-button behavior across all 17 top-level screens. Decision-engine rules and cross-cutting interactions documented.

Status:  APPROVED — incorporates Max's review of Step 1. Updated 2026-05-13 with Daily Recap (#14), Lifestyle onboarding step, eating-out Dashboard CTA, and per-screen modifications.

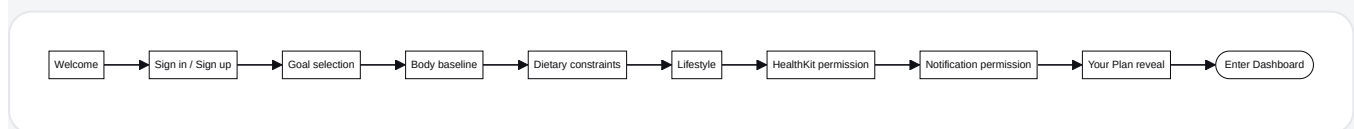

Purpose: every screen from the App Map, now with navigation arrows and per-button behavior. Still black-and-white, still no visual opinions. Answers the question: *"What happens when I tap this?"* for every interactive element on every screen.

Format: one Mermaid navigation diagram, then a per-screen button reference table.

1. Master navigation diagram

2. Onboarding flow (linear)

Nine steps total. Each step has **Next** (advances) and **Back** (returns to previous). HealthKit and Notification prompts are skippable but log the skip for later prompting in-app. The Lifestyle step is a single 3-option chooser (cook at home / eat out / both); it tunes recipe and restaurant ranking from the first session forward.

■ 3. Per-screen button reference

3.1 Dashboard (Home tab root)

Above-the-fold contract: Health Score hero + macro ring + next-meal verdict + "I'm eating out right now" quick action + week-schedule day tiles + workout to-do checklist + habit-tracking dot grid + coach nudge (when triggered) + mood/energy one-tap — densely packed, light surface, full-saturation accents per DESIGN.md.

ELEMENT	TAP BEHAVIOR
Health Score hero (big number + delta)	→ Health Score detail
Verdict banner CTA (e.g. "Log lunch")	→ Add Meal sheet pre-routed to the predicted meal slot
"I'm eating out right now" quick action	→ Restaurant Guidance with today's remaining macros pre-loaded
Macro ring + inverted-row P/C/F band	→ Progress, scrolled to today's macros
Week-schedule day tile (Today / Sat / Sun...)	→ Workout Detail for that day
Workout to-do row	Tap checkbox = mark set complete; tap row = Workout Detail; long-press = Workout Set Logger sheet
Habit-tracking dot grid	→ Habit Tracking detail
Mood/energy one-tap row	Inline scale; on selection logs and dismisses
Today's meals row	→ Food Detail for the tapped meal
Quick-add (+) FAB	→ Add Meal sheet (Photo default)
Avatar (top-right)	→ Your Plan
Coach nudge card (when triggered)	→ Coach Chat with prompt context preloaded
Daily Recap card (after 8pm)	→ Daily Recap screen

3.2 Your Plan / Profile (Home child)

ELEMENT	TAP BEHAVIOR
"Why this plan" expander	Reveals reasoning inline
"Recalculate My Plan" button	→ Recompute confirm modal (intentional, slightly weighty — prevents accidental triggers per Max) → recomputes macros
Edit goal	→ Goal selection screen (single-step, returns here)
Edit body baseline	→ Body baseline screen (returns here)
Edit dietary	→ Dietary constraints screen (returns here)
Edit lifestyle	→ Lifestyle screen (returns here)
Settings gear (top-right)	→ Settings

3.3 Settings (Home child)

ELEMENT	TAP BEHAVIOR
Account	→ Account detail (email, sign-in method)
Notification preferences	→ Toggle list (quiet hours fixed 10pm–7am, individual trigger toggles)
HealthKit	→ System permission sheet
Data export	→ Email export confirm
Sign out	→ Returns to AuthCheck → Welcome

3.4 Meal Log day view (Log tab root)

ELEMENT	TAP BEHAVIOR
Day selector (today ± swipe)	Changes the day's entries
Meal row	→ Food Detail (editable)
Persistent floating add button (Max: high-frequency surface, must be fast)	→ Add Meal sheet (Photo default)

ELEMENT	TAP BEHAVIOR
Restaurants shortcut	→ Restaurant Guidance
Recipes shortcut	→ Recipe Browser
Meal Plan shortcut	→ Meal Plan Generator
Grocery shortcut	→ Grocery List

3.5 Add Meal — Photo / Search / Scan (Log child)

Default tab: Photo (Max — most frictionless for real life).

ELEMENT	TAP BEHAVIOR
Segmented control	Switches input mode (Photo / Search / Scan)
Photo capture button (default view)	Opens camera → AI parse → Food Detail with parsed items
Search result row	→ Food Detail with portion editor
Barcode scan	Opens camera in scan mode → resolves → Food Detail
Recent foods chip	One-tap log with last-used portion

3.6 Food Detail / Portion editor (sheet)

ELEMENT	TAP BEHAVIOR
Portion stepper	Adjusts macros live
Meal slot selector	Breakfast / lunch / dinner / snack
Save	Persists meal → returns to caller (Log or Dashboard)
Delete (if editing existing)	Confirm → removes meal

3.7 Restaurant Guidance (Log child — also Dashboard quick-action target)

When entered via Dashboard's "I'm eating out right now" CTA, today's remaining macros are pre-loaded as a filter and the **top 3 chain picks show macros immediately** (Max).

ELEMENT	TAP BEHAVIOR
Search restaurant	Filters curated list
Restaurant row	→ Restaurant Detail
Top 3 featured cards (when entered from Dashboard CTA)	Each pre-shows a coach-recommended menu item with macro fit
Nearby toggle	(Pilot: location optional; if granted, sorts by distance)

3.8 Restaurant Detail (Log child of child)

ELEMENT	TAP BEHAVIOR
Menu item row	Shows macros inline; tap chevron → Food Detail to log
"Coach pick" badge tap	Inline explanation of why this item fits remaining macros
Log this item	→ Food Detail prefilled

3.9 Recipe Browser (Log child)

Default view leads with "Based on your remaining macros today" section (Max — that's the differentiator). Generic browse sits below.

ELEMENT	TAP BEHAVIOR
"For your remaining macros" section (default)	Recipes ranked to fit today's remaining budget; tap → Recipe Detail
"Browse all" toggle	Switches to generic browse
Category filter	Cuisine / time / difficulty
Recipe card	→ Recipe Detail

3.10 Recipe Detail (Log child of child)

ELEMENT	TAP BEHAVIOR
Add to Grocery List	Appends missing ingredients → returns with toast
Log as meal	→ Food Detail with macros prefilled

ELEMENT	TAP BEHAVIOR
Save to favorites	Toggles favorite state

3.11 Meal Plan Generator (Log child)

ELEMENT	TAP BEHAVIOR
Generate button	Calls AI → returns three plan options
Plan option card (×3)	Each card displays a single-line summary (e.g. "Higher protein, lighter dinners") — Max wants the choice to feel easy; tap → Plan Detail
Accept this plan	Persists plan; auto-populates Grocery List; returns to Log
Regenerate	New three options (counts against AI cost)

3.12 Grocery List (Log child)

Grouped by category (Max — produce, protein, pantry, etc.). Clean and minimal, not a spreadsheet.

ELEMENT	TAP BEHAVIOR
Checkbox	Marks item bought (struck through)
Item row long-press	Edit / delete
Add item (manual)	Inline text entry (added to inferred or chosen category)
Clear bought	Removes all checked items
Share	iOS share sheet (export as text)

3.13 Coach Chat (Coach tab root)

Input placeholder copy: *"Ask me anything about today..."* (Max — should feel like asking an expert, not texting a bot).

ELEMENT	TAP BEHAVIOR
Message input + send	Standard chat send
Inline Learn card	Expands inline; "Read full article" → Article Detail
"Log this meal" suggestion chip	→ Add Meal sheet with context preloaded

ELEMENT	TAP BEHAVIOR
Voice input mic	Speech-to-text fills the input
New conversation	Archives current thread (still searchable)

3.14 Learn home (Learn tab root)

ELEMENT	TAP BEHAVIOR
Search bar	Full-text search across articles
Category tile	Filters home view to that category
Article card	→ Article Detail
Recently viewed row	→ Article Detail

3.15 Article Detail (Learn child)

ELEMENT	TAP BEHAVIOR
Back	→ Previous screen (Learn or Coach)
Share	iOS share sheet
Save	Adds to "Saved articles" in Learn home
Related article tile (bottom)	→ Article Detail (new)

3.16 Progress overview (Progress tab root)

Default view: Weekly (Max — daily fluctuations are noisy and discouraging; weekly trends tell the real story).

ELEMENT	TAP BEHAVIOR
Time range selector	Weekly (default) / Monthly / 90-day / All
Weight card	→ Weight history full screen
Macro adherence card	→ Macro history full screen
Add Photo button	→ Photo Capture sheet
Add Measurement button	→ Measurements Entry sheet

ELEMENT	TAP BEHAVIOR
Log Mood button	→ Mood Entry sheet
Photo grid thumbnail	→ Photo viewer (swipe through history)

3.17 Daily Recap / Coach Summary (Home child — NEW per Max)

Closes the loop on event-driven notifications. Triggered as a push at 8pm; also reachable from a Dashboard card and from the avatar menu.

ELEMENT	TAP BEHAVIOR
Hero verdict	"Here's what I noticed today" — one-paragraph summary in coach voice
Highlight rows	Each row covers one signal: macro adherence, sleep, mood/energy, training, weight trend
Tomorrow card	One concrete suggestion for tomorrow ("Try a higher-protein breakfast")
"Reply to coach"	→ Coach Chat with recap context preloaded
Close (X)	→ Dashboard

3.17b Workout Detail / Workout Plan (Log child)

Manual-entry-only at Pilot. No adaptive prescription. Shows today's planned workout + the week's schedule.

ELEMENT	TAP BEHAVIOR
Hero strip (workout name, exercise count, est. time, est. kcal)	Decorative
Volume / Sets / Est. time stat row	Decorative
Exercise row (e.g. Bench press · last 4×8 @ 180 lb · target 4×8 @ 185 lb)	Tap → Workout Set Logger sheet
Add exercise (+)	→ Free-form exercise entry
Sticky bottom: "Start workout"	Begins a workout session (in-app timer + logger)
Week schedule pills	Tap → switch to that day's plan

3.17c Health Score detail (Progress child)

ELEMENT	TAP BEHAVIOR
Hero: composite Health Score + 30-day delta	Decorative
Component cards (Nutrition / Training / Sleep / Recovery / Body comp), each with its own score and trend sparkline	Tap → relevant Progress section
"Why this score" expander	Coach-voice explainer of weights and recent contributors

3.17d Habit Tracking detail (Progress child)

ELEMENT	TAP BEHAVIOR
Full habit dot grid (weeks × habits)	Decorative
Habit row (name, definition, this-week count)	Tap → toggle today's mark
Add habit / Edit habits	→ Habit editor sheet
Time-range selector	Weekly (default) / 30-day / All

3.18 Lifestyle (Onboarding step — NEW per Max)

ELEMENT	TAP BEHAVIOR
Three selectable cards: Cook at home / Eat out mostly / Both	Single-select; Continue advances
Continue	→ HealthKit permission
Back	→ Dietary constraints

3.19 Sheets (no screen-level navigation)

SHEET	BUTTONS
Photo Capture	Camera / library picker, Save, Cancel
Measurements Entry	Numeric fields (waist, hips, chest, arms, thighs), Save, Cancel
Mood Entry	1–5 scale for mood + energy, optional note, Save, Cancel
Recompute Plan confirm	"This will recalculate based on latest weight." Confirm / Cancel

■ 4. Cross-cutting interaction rules

These apply globally, not per screen:

RULE	BEHAVIOR
Back gesture	Standard iOS swipe-from-left-edge available on every pushed screen
Tab tap while on tab root	Scrolls to top
Tab tap on deep screen in same tab	Pops to tab root
Pull to refresh	Available on Dashboard, Meal Log, Progress, Coach Chat
Offline mode	Read-only banner appears; write actions (Save / Log / Generate) disabled with explanatory toast
Coach proactive push tap	Deep-links to relevant screen (e.g. "skipped lunch?" → Add Meal pre-routed to lunch slot)
Onboarding skip	Available only on permission prompts (HealthKit, Notifications); not on data-entry steps

■ 5. Layout decisions deferred to Step 3 (Wireframes)

Pure visual/layout calls — answered when wireframes are generated:

1. Verdict placement on Dashboard (above macros confirmed by Max's "above the fold" requirement).
2. Meal Log: list vs. timeline vs. cards.
3. Coach Chat: bottom input or floating.
4. Progress: scroll-snap sections vs. scrollable single view.
5. Tab bar labels always-visible vs. active-only.

■ 6. Product decisions — resolved

#	QUESTION	RESOLUTION
1	Does Dashboard verdict CTA pre-route to a meal slot?	Yes — pre-routed to the predicted next meal slot.

#	QUESTION	RESOLUTION
2	Does Meal Plan auto-populate Grocery on Accept?	Yes — auto.
3	On sign-out, wipe local SQLiteData cache?	Yes — wipe. Avoids any next-user data leakage on shared devices.

■ 7. Status

- [x] Max review of navigation arrows and per-button behavior (2026-05-13)
- [x] Resolution of all product questions
- [] Sign-off recorded in `docs/ios-guide/decisions.md`

Output of Phase 0.5 · Step 2. Next: Step 3 — Wireframes (grayscale layouts for each screen).
