

App Map v2.1

Tab structure, screen inventory, navigation rules — incorporates D1-D19 consolidation (2026-05-21)

FuelWell — App Map v2.1 (Phase 0.5 · Step 1)

Version: 2.1 (2026-05-21 — Phase 0.5.3 consolidation)

Status:  APPROVED v2 — Robert reorganized the IA 2026-05-19 after the Round 1 mockup review. Max's Step 2 blockers resolved. All 27 Round 1 mockups stay; they're re-homed in the new tab/menu structure. v2.1 layers in the D1-D19 consolidation pass from the Phase 0.5.3 final review (see `decisions.md`).

What changed from v1 → v2:

- Tab bar: `Home · Log · Coach · Learn · Progress` → `Home · Meals · Coach · Exercise · Progress` (single-word labels in the bar per D9; full names "Meals & Nutrition" and "Exercise & Activity" appear as screen titles on the hub landings)
- Coach is the centerpiece tab — visually distinct (speech-bubble icon, inverted shading)
- "Learn" tab dissolved into the new **Help** screen, accessed from the Dashboard top bar
- New top-level navigation surface: a **hierarchical Menu** (Tools / Coach / Settings / Help / About)
- Dashboard adopts **Max's Tier 1/2/3 framework** — max 3 elements above the fold
- New Dashboard widget: **Inflows/Outflows** (dual concentric ring with day/week/month/year toggle)
- New per-tab landing pages: **Meals/Nutrition hub** and **Exercise & Activity hub** (the old "Meal Log day view" and "Workout Detail" are sub-pages under these)

- Nothing is deleted — every Round 1 screen has a new home

Root principle (PRINCIPLES.md): Dashboard is the root. Every other screen exists to serve the Daily Loop — *Dashboard* → *Log* → *Adjust* → *Continue* → *Repeat*.

1. Entry sequence — Onboarding (pre-tab)

Unchanged from v1. Nine sequential steps; runs once per user.

```
FuelWell (splash)
  → Sign in / Register
    └─ First-time → Onboarding → existing 9-step flow
        1. Welcome
        2. Sign in / Sign up
        3. Goal selection
        4. Body baseline
        5. Dietary constraints
        6. Lifestyle
        7. HealthKit permission
        8. Notification permission
        9. Your Plan reveal
            → Dashboard (Daily Loop starts)
    └─ Returning → Dashboard direct
```

2. Tab bar — five tabs, Coach centered

Tab-bar labels are single words per D9 (Home · Meals · Coach · Exercise · Progress). Full names ("Meals & Nutrition", "Exercise & Activity") only appear as the screen titles on the hub landings.

Order	Tab label (in bar)	Hub screen title	Visual treatment	Tier
1 (leftmost)	Home	Dashboard	Standard SF Symbol <code>house.fill</code>	Outer
2	Meals	Meals & Nutrition	Standard SF Symbol <code>fork.knife</code>	Second
3 (center, prominent)	Coach	Coach Chat	Raised-circle FAB-style container (D6), inverted <code>bg.elevated</code> <code>#0F1117</code>, slight elevation	Centerpiece
4	Exercise	Exercise & Activity	Standard SF Symbol <code>figure.run</code>	Second
5 (rightmost)	Progress	Progress	Standard SF Symbol <code>chart.line.uptrend.xyaxis</code>	Outer

The Coach tab is always visually distinct, even when inactive. The rest follow iOS standard active/inactive coloring.

3. Dashboard — Tier 1/2/3 framework (Max's blocker resolved)

The Home tab root. Top bar carries Menu (left) and Help (right). Max's hard ceiling: maximum 3 visual units above the fold.

Tier 1 — always above fold

Element	Why Tier 1
Health Score hero	Single most important signal of how the user is doing. Includes 30-day delta and "Why?" expander.
Inflows/Outflows widget (dual concentric ring)	Creative energy-balance visual. Outer ring = calories in by macro; inner ring = calories out by source (BMR / activity / workout). Center = net. Toggles day/week/month/year.
Verdict-of-the-moment CTA	One-line "what should I do right now" with a primary action. The Daily Loop's entry point.

Tier 2 — visible on first scroll

- Activity overview card (workouts logged, active minutes, calories burned, mini weekly bar)
- Nutrition/Meals overview card (today's meals snapshot, remaining macros bar)

- My day / week / month view (segmented timeline of intake vs. expenditure over the chosen window)

Tier 3 — progressive disclosure (deeper scroll or expanded states)

- Progress overview summary (sparkline + trend line)
- Daily Recap card (appears only after 8pm — also triggered as a push and accessible from the Menu)
- Coach nudge card (event-driven — appears only when a trigger fires; otherwise hidden)

Habit Tracking is NOT on the Dashboard in v2. It lives in the Progress tab and in the Menu under Tools > Tracking.

§ Day 1 Dashboard welcome mode (D7)

The Dashboard has two co-existing states. The populated state described above is the canonical Dashboard. On the user's first session, before any meals or workouts have been logged, the Inflows/Outflows ring is replaced by a single large welcome card:

- **Welcome card copy:** "Start here: log your first meal" (primary CTA).
- **Trigger:** zero logged meals AND zero logged workouts for the current user.
- **Collapse rule:** the welcome card auto-collapses after the first meal is logged; the canonical Inflows/Outflows ring takes its place on the next Dashboard render.
- **Tier 1 contract honored:** the welcome card occupies the Tier 1 slot that the Inflows/Outflows ring normally holds; Health Score hero and Verdict CTA remain visible.
- **Health Score during welcome mode:** still renders its day-1 fallback ("Building your baseline — 7 days of data unlocks your Health Score") with a placeholder ring.

§ Health Score component notes (D11, D14)

- **Recovery baseline (D11):** Recovery is computed off a 14-day rolling average of resting heart rate. Before 14 days of wearable data exist, Recovery is *excluded* from the Health Score and the remaining four components proportionally re-weight (same mechanism as the missing-component rule in § 8). The Health Score detail screen surfaces this explicitly with the copy: "Recovery unlocks with wearable data (Apple Watch or compatible device)" — not a silent reweight.
- **Cause-first delta framing (D14):** the Dashboard hero and the Health Score detail screen render score deltas in cause-first form, not numeric-first. Example: "↓ sleep variance this week" rather than "↓ -2.3 vs last week". The numeric delta still exists internally for telemetry; it just isn't the lede in user-facing copy.

4. Menu — hierarchical navigation (new in v2)

Opened from the hamburger icon top-left of Dashboard (and any screen via the universal Menu icon). Full-screen sheet with grouped sections.

D4 — hierarchical-collapsed by default. Single-pane view. Categories visible by default (Snapshot · Tracking · Meals · Training · Coach · Settings · Help · About); each expands on tap. No two-tier tile redesign. Larger text and less whitespace than v1.

USER HEADER (avatar · name · goal pill · today's Health Score)

TOOLS

- Snapshot
 - Health Score
 - Daily Recap
 - Inflows / Outflows
 - My day · week · month
- Tracking
 - Habits
 - Weight history
 - Body photos
 - Measurements

- Account
- Permissions
- Notification preferences
- Data export
- Sign out (destructive)

HELP

- Learn articles (search + categories)
- Contact support
- Send feedback

ABOUT

- About FuelWell
- Privacy

5. Help screen — replaces the v1 Learn tab

Accessed from the Help icon top-right of Dashboard. Single screen that combines:

- **Search bar** — "Search articles, settings, or ask a question"
- **Featured article today** — hero card with image, 3-min read pill
- **Categories** — Nutrition basics · Macros explained · Eating out · Recovery · Training fundamentals · Sleep & energy · Mindset
- **Continue reading** — articles started but not finished
- **Quick settings** — Notifications, HealthKit, Account, plus "All settings →"
- **Talk to coach** — small card linking to Coach Chat
- **Send feedback** — text-link

Article tone (carried over from v1 Learn): ≤3-minute reads, smart-friend voice, every article ends with a "One thing to try today" actionable takeaway card.

6. Tab landings (new in v2)

Each non-Home tab opens a **hub landing page** that surfaces sub-pages, not a single screen.

6.1 Meals & Nutrition tab landing

Section	Content
Hero	Today's plate — compact Inflows/Outflows ring + remaining macros bar
Today's meals	Logged meal rows + pending dinner slot
Quick access	Meal Log · Restaurant Guidance · Recipe Browser · Meal Plan Generator · Grocery List · Macro History (deep-link → Progress › Macro adherence per D12)
Recent foods	Horizontal scroll of recent meal chips for one-tap re-log

6.2 Exercise & Activity tab landing

Section	Content
Hero	Today's workout card OR Rest day card
This week	Day chips with workout/rest indicators and minutes

Section	Content
Quick access	Workout Log · Activity Tracker · Workout Plans · Exercise Library · Schedule · Trainer workouts (manual entry)
Recent workouts	Last 3 logged workouts

6.3 Progress tab landing (v2)

Default time range: weekly.

Section	Content
Health Score trend	Current score + 30-day delta + sparkline. Tap → Health Score detail.
Weight	Line chart of weekly averages + "Add weight"
Macro adherence	Weekly bar chart + summary
Body photos	Horizontal scroll + "Add photo"
Measurements	List with weekly trend arrows
Mood & energy	Weekly average + small heatmap
Habit Tracking	Compact dot grid (last 14 days × 4 habits) + "View all habits" link

6.4 Coach tab

Coach Chat. Inline Learn cards expand within the chat (the article surface remains in Help, but contextual cards are also surfaced inline).

7. Screen inventory v2 — 29 top-level screens (17 from v1 re-homed + 12 new/elevated; Macro History removed per D12, Learn home retired per D10)

New in v2 marked with ★. Re-homed from v1 marked with ♻️.

Home tab

#	Screen	Notes
1	Dashboard v2 ★	Tier 1/2/3 layout per Max
2	Daily Recap / Coach Summary ♻️	Reachable from Dashboard card, 8pm push, and Menu
3	Your Plan / Profile ♻️	Recalc confirm modal
4	Settings ♻️	Reachable from Menu and Help
5	Menu (hierarchical sheet) ★	New navigation surface

#	Screen	Notes
6	Help screen ★	Replaces v1 Learn tab
7	Inflows/Outflows full screen ★	Sankey-style flow diagram, daily/weekly/monthly/yearly
8	Health Score detail ʘ	Composite breakdown
9	Habit Tracking detail ʘ	Reached from Menu and Progress

Meals & Nutrition tab

#	Screen	Notes
10	Meals & Nutrition hub ★	Tab landing
11	Meal Log day view ʘ	Persistent floating add button
12	Add Meal sheet ʘ	Photo default
13	Food Detail / Portion editor ʘ	Sheet
14	Restaurant Guidance ʘ	Curated chain DB
15	Restaurant Detail ʘ	Coach picks at top
16	Recipe Browser ʘ	Leads with remaining-macros section
17	Recipe Detail ʘ	Add to Grocery / Log as meal
18	Meal Plan Generator ʘ	Three options, single-line summaries
19	Grocery List ʘ	Grouped by category

Macro History (D12) — deep-link, not a screen. The Meals & Nutrition hub's "Macro History" row deep-links to **Progress → Macro adherence** detail. There is no standalone Macro History screen at Pilot. The Meals & Nutrition hub still surfaces the row; the destination is Progress, not a new screen.

Learn home (D10) — retired in Phase 0.5.3. The v1 "Learn home" screen (Screen 31, slug `21-learn-home`) is not shipping at Pilot. All article content is reachable through the Help screen and inline Learn cards in Coach Chat.

Coach tab

#	Screen	Notes
21	Coach Chat ʘ	Soul of the app, "Ask me anything about today..." placeholder
22	Article Detail ʘ	Reachable from Help and inline from Coach Chat

Exercise & Activity tab

#	Screen	Notes
23	Exercise & Activity hub ★	Tab landing
24	Workout Detail ↻	Active session: pre-workout + in-progress + summary
25	Workout Log ★	History view of past workouts
26	Activity Tracker ★	Passive activity from Apple Health
27	Workout Plans ★	Library / templates
28	Exercise Library ★	Searchable exercise reference
29	Schedule ★	Week / month view of planned workouts

Progress tab

#	Screen	Notes
30	Progress overview v2 ↻	Weekly default; surfaces Health Score, weight, macros, photos, measurements, mood, habits

Sheets / modals (not counted as screens): Food Detail editor, Recipe → Grocery confirm, Photo Capture, Measurements Entry, Mood Entry, Recompute Plan confirm, Workout Set Logger, Habit Toggle, permission prompts, Inflows/Outflows lane drill-down sheets.

Anti-pattern reminder (DESIGN.md): no celebratory streak chips, badges, or gamification. The Habit grid is a *visualization*, not a reward. The Health Score is a *diagnostic*, not a score-to-beat.

8. Health Score v1 formula (Max's blocker resolved)

Component	Weight	Source
Nutrition adherence	35%	% of days within macro targets, rolling 7-day window
Training consistency	25%	Workouts completed vs. planned, rolling 7-day window
Sleep	20%	Average sleep duration + consistency, rolling 7-day window
Recovery (HRV / RHR)	10%	HRV trend + resting HR vs. baseline, rolling 7-day window
Body comp trend	10%	Weight + body fat % movement vs. goal direction

- **Range:** 0–100
- **Missing components:** *excluded* — remaining components re-weighted proportionally. No penalty zeros.
- **Day-1 fallback:** display "Building your baseline — 7 days of data unlocks your Health Score" with a placeholder ring. No score number rendered.

- **Score is a diagnostic, not a competition.** No leaderboards, no "your friends scored X" comparisons, ever. (Internal terminology — user-facing copy avoids "diagnostic" per D1.)
- **Recovery baseline (D11):** Recovery uses a 14-day rolling average of resting HR. Until 14 days exist, Recovery is excluded and the other four components re-weight proportionally. Detail screen renders: "Recovery unlocks with wearable data (Apple Watch or compatible device)" — explicit, not silent.
- **Delta framing (D14):** cause-first on Dashboard hero and Health Score detail. "↓ sleep variance this week", not "↓ -2.3 vs last week".

9. Empty states — required on every screen (Max's blocker resolved)

A thoughtful empty state is a brand moment, not a placeholder. Every screen below has an empty-state copy line in coach voice.

Screen	Trigger	Empty-state copy
Dashboard	Day 1, no data	"Welcome — your day starts here. Log your first meal whenever you're ready."
Health Score	<7 days of data	"Building your baseline — 7 days of data unlocks your Health Score."
Inflows/Outflows	No meals or workouts logged today	"Log your first meal or workout to see your energy flow."
Meal Log	Day 1, no entries	"No meals logged yet. The fastest way is a photo — tap the + below."
Add Meal (Search)	No recent foods	"Start typing — we'll pull from your previous meals and the food database."
Recipe Browser (for-macros)	No saved recipes that fit today	"Nothing in your saved recipes fits today's remaining macros. Want a fresh meal plan, or browse all?"
Meal Plan	No plan generated this week	"Tell us your week. We'll generate three options."
Grocery List	Empty	"Your list is empty. Generate a meal plan or add items below."
Restaurant Guidance	No location granted	"We can show top picks anywhere — grant location to sort by what's nearby, or browse the curated chain list."
Coach Chat	First open	"Hi Robert. I'm here when you want a second opinion. What's on your mind?"

Screen	Trigger	Empty-state copy
Help / Learn	No saved articles	"Browse by category, or search for a question. Every article ends with one thing you can try today."
Article Detail	Article unavailable	"We couldn't load this article. Try again, or browse another below."
Progress overview	<7 days of data	"Progress fills in as you log. Weight, photos, mood — one entry kicks it off."
Weight history	Empty	"Log a weight and we'll start your trend line."
Body photos	Empty	"Photos make recomposition real. Add one when you're ready."
Measurements	Empty	"Tape measurements catch what the scale misses."
Mood & energy	Empty	"How are you feeling? One tap and we start to see the patterns."
Habit Tracking	No habits chosen	"Pick 3 habits to start. Coach can suggest some."
Daily Recap	<1 full day of data	"Tomorrow's the start of your recap. The more you log, the smarter this gets."
Workout Detail	No workout planned today	"No workout planned today. Pick a template, or take a rest day."
Workout Log	No history	"Your first logged workout shows up here."
Activity Tracker	No Apple Health data	"Connect Apple Health to see your daily movement here."
Workout Plans	No saved plans	"Browse plans or build your own — coach can suggest one based on your goals."
Exercise Library	No favorites	"Tap an exercise for the form video and tip notes."
Schedule	Empty week	"Plan a workout to start your week."
Settings	n/a	n/a

9.1 Coach voice no-gos (D13)

Apply in all coach-facing copy (Daily Recap, Coach Chat, nudges, empty states, push notifications):

(1) never use "you missed", "you skipped", "you went over"; (2) never show adherence below 60% as an absolute % without trend comparison; (3) Daily Recap always leads with neutral or positive before any gap observation.

10. Daily Recap trigger (Max's blocker resolved)

- **Trigger time:** 8pm local device time.
 - **Quiet hours:** 10pm–7am. 8pm clears the window by 2 hours.
 - **Future-state inheritance:** if the user customizes their notification schedule in a future release, Daily Recap inherits that schedule.
 - **Travel / timezone change:** trigger fires at 8pm in the new local time after the device switches zones. No retro-fire.
-

11. Status

- ☒ Max review of v1 (2026-05-13)
 - ☒ App Map v2 reorganization (Robert, 2026-05-19)
 - ☒ All 5 of Max's Step 2 blockers resolved
 - ☐ Round 2 mockups generated (Dashboard v2, Inflows/Outflows widget + full, Activity overview, Meals/Nutrition hub, Exercise & Activity hub, Progress v2, Menu, Help, Tab bar component)
 - ☐ Combined review PDF compiled for final round
 - ☐ Sign-off recorded in `decisions.md`
-

Output of Phase 0.5 · Step 1 v2 — Updated 2026-05-19. Next: regenerate Step 2 (Flow Chart) and Step 4 (Mockups Round 2) against this IA.
